Forecast for Tuesday 01 Jun 2021

Weather: A fine and settled day, with any early morning low level mist soon clearing. Dry with an ample amount sunshine across the Brecon Beacons, allowing temperatures to rise readily during the afternoon making it feel very warm in the sunshine. Some cloud may bubble up during the afternoon but this should clear into the evening.

Chance of cloud free mountain/hill tops above 600m: 1005 throughout.

Visibility: Very good to excellent with distant hills clearly visible from the summits. Any early morning mist across low lying ground will quickly clear.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will again be high to very high Tuesday, therefore extra protection (sun screen) will be needed if spending any length of time on the hills or mountains. Given the increasingly warm weather also be aware of dehydration.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 02 Jun 2021

Weather: Cloud will increase from the south and west during the early hours of Wednesday, heralding the arrival of a band of showery rain pushing north across the Brecon Beacon. Generally cloudy during the morning with a risk of heavy showers and thunderstorms developing from early morning. Further showers are possible during the afternoon with it becoming drier later.

Maximum wind: 10-15mph, gusting 25-30mph particularly near showers.

Chance of cloud free mountain/hill tops above 600m: 60% dropping to 50% during the afternoon

Visibility: Generally good, however cloud bases may occasionally drop close to 600m during the morning which give some temporarily poor visibilities over the summits. However as showers develop, sudden deterioration in the visibilities are possible.

Temperature: **Valleys:** PS11 Celsius, becoming PS17 Celsius
At 600m: PS7 Celsius, becoming PS15 Celsius
Freezing level: Above the summits.
